

## **Fact sheet for Round 2 Development Partnerships**

### **SOUTH WEST:**

**Competitive Confident and Credible third sector (C3)** – This Development Partnership developed quality systems and a business approach to ensure a vibrant future for the social economy in Bristol and surrounding areas. It developed C3Perform, a toolkit which enables third sector organisations to improve their performance through a process of self-assessment, action planning and implementation.

**Create** – This Development Partnership comprising national business support organisations provided help to people considering self-employment, particularly through franchising. It developed and delivered independent and impartial information and advice through on-line tools, training and workshops, one-to-one advice and mentoring. It supported individuals from ethnic minorities, women, over 50's and young people.

**Governance, Empowerment and Learning (GEL)** – This Development partnership developed new engagement techniques to address the systemic failure to engage hard-to-reach learners in ten target neighbourhoods in outer areas with low levels of learning and employment participation. This included providing capacity building support to neighbourhood organisations to enable them to become local labs for learning and engagement.

**South West Opportunities for Older People (SWOOP)** – This Development Partnership delivered programmes to older people throughout the South West which allowed them to explore skills coaching, employment advice and guidance, interview training, psychometric testing, work experience, volunteer training, computer training, self assessment and CV writing, business start-up/entrepreneurship advice and guidance.

**Through Assistive Technology to Employment (TATE)** – This Development Partnership supported the needs of disabled people in aspects of their safety and independence in order to increase their prospects of employment. The project highlighted the benefits of using person centred Electronic Assistive Technology (EAT) for individuals with a learning disability and their carers.
